

Rocky Pointe Marina March 2025 Newsletter

Spring is Around the Corner

Hopefully last week's snow and ice event is the last for the year and the warmer days of spring will not be overshadowed by another freeze. Fortunately, there have not been any weather-related issues at the marina this year.

Fire Extinguisher Annual Inspection

In the second half of March, the floating home fire extinguishers will be inspected by our service company. We pay \$10 for the first one. If you have more, we will charge you on the next billing. Boaters can have theirs inspected as well for \$10 each. Please bring them to the office before March 10th. Make sure your name is on them.

Boat Slip Water

We plan to have the water back on to the boat slips by March 7th. There are many "green" boats in the marina that need to be washed. Please plan on taking care of your boat in the next couple of months. This includes removing the winter tarps.

Garden plots

Floating home residents can start signing up for garden plots on March 1st. If you want a second plot, those will be available April 1st. Contact Jen@rpmarina.com.

Tree stumps

We have been asked many times why we leave the tree stumps, and why so tall. The answer is twofold. ODFW requests that we do this to provide bird habitat. The roots provide bank stabilization along the shoreline.

Boat Slip Rate Increase

Slip rates will increase by \$20 on June 1, 2025
